Friday and Saturday, June 19-20

Emmett Flynn's production of Owen Davis' famous melodrama

**"NELLIE, the Beautiful Cloak Model"**

featuring

Claire Windsor, Edmund Lowe,  
Mae Busch, Raymond Griffith,  
Hobart Bosworth.

## CLARESHOLM LOCAL NEWS

T. C. Milnes returned the first of the week from his overseas trip.

Harry Dow and Stanley Wyatt were exhibiting the fruits of their fishing trip to Chin Lake a few days ago.

Hoot Gibson, who is at present in Calgary, will be shown on the Rex screen Wednesday, June 24, in one of his best pictures, "Hook and Ladder."

Remember all roads lead to Clareholm next Wednesday, the big sports day here. Big baseball tournament, horse races, etc. and a dance at night.

Mrs. Chandler and three children, and her sister Mrs. Stone of Spokane, came overland by motor to visit Mrs. Horlacher here, after which they will visit friends at other Alberta points.

Emmett Flynn's production of Owen Davis' famous melodrama, "Nellie, the Beautiful Cloak Model," with Claire Windsor in the title role, at the Rex theater on Friday and Saturday nights this week.

Clareholm Chautauqua dates are July 22 to 28. A splendid program of entertainment has been prepared. The manager claims it is the strongest program in the history of The Dominion Chautauqua.

Miss Louise Barre of Clareholm was a member of the graduating class of nurses at the Holy Cross hospital, Calgary, on Tuesday evening this week, the graduating exercises being held in Al Azhar Temple.

The regular meeting of the U. F. W. A. Local No. 244 will be held on Friday, June 26, at the home of Mrs. J. L. Salmon. Should the weather prove unfavorable, the meeting will be held at the rest room instead.—Sec.

Sunday, June 21st, the Carleton Local will celebrate U.F.A. Sunday at the Carleton school house, commencing at 3 p.m. Rev. W. C. Marsh will have charge of the service. Special music will be provided. Come one, come all, and bring your friends.

Mrs. A. Foss, who is 84 years old, met with a very unfortunate accident last Thursday. She slipped on the doorstep, which was wet and slippery from the rain, and fell in such a way that her left leg was broken. She was attended by Dr. McMillan and Dr. Tupper, and is doing as well as could be expected for a person of her advanced age.

English Lutheran services are being conducted every two and three weeks in the Presbyterian church of Granum by R. F. Holtzen, Lutheran pastor of Clareholm. The next service will be in the afternoon of June 21st, beginning at three o'clock. Special religious instruction is offered to all interested children after the service.

Services will be held in St. John's church on Sunday next, June 21st, as follows: 8 a.m., holy communion; 11 a.m., morning prayer and sermon; 7:30 p.m., evening song and sermon. As the pastor expects to be away during the month of July, it is hoped that all who can will take advantage of the celebration of holy communion on Sunday at eight o'clock.

## Bethel United Church

"A Christian Fundamental" will be the theme for the Rev. Geo. Webber's sermon in Bethel church on Sunday next, June 21. This sermon is based on one of the very striking and significant messages of Jesus at the close of His earthly ministry.

In the evening at 7:30 o'clock the Rev. Mr. Webber will speak on "Ananias," a New Testament character worthy of our meditation today.

A cordial welcome is extended to all who wish to share in these services. Bright, brief, practical Gospel messages may be anticipated. During the warmer weather the services will be made shorter.

## The United Church of Canada

The birth of the United Church of Canada by the merging of the Congregational, Presbyterian and Methodist churches in Canada was fittingly celebrated in Clareholm last Sunday, June 14. Special services in which the congregations of St. Andrew's and Bethel churches united were held morning and evening, and proved to be services of very special interest and gratifying success. St. Andrew's church was filled to capacity at the morning service, and Bethel church was also crowded for the evening service. The music for the day was rendered by a union choir under the direction of W. G. Moffatt, one anthem being given at each service, adding much to the interest and inspiration of the services. The selections by the male quartette at each service were also well received. Both services were conducted by the Rev. Geo. Webber, pastor of Bethel church, who spoke at each of the services on a timely theme. The morning sermon was on the text, "Upon this rock I will build My Church," and the evening sermon was based on the words, "All things are yours."

While circumstances render it necessary for these two congregations of the United Church of Canada to retain their separate identity as congregations for a short time, the interest shown in the services of last Sunday, and the fine spirit of unity manifested throughout, augur well for the success of the United Church in this community.

## Chinook Gossip

Lightning struck the barn of Peter Schipper and also the garage of E. G. Knutson a week ago last Tuesday. No damage was done.

Mrs. Annie Davidson who spent some weeks in Calgary, returned a few days ago.

Tommy Mason bought 380 acres of land from John McInnes some time ago. The farm formerly belonged to Peter Christian. Price \$30 per acre.

Clarence Nowatney went to Lethbridge last Saturday for medical treatment.

Ed. Arlt has been busy for the last three weeks building an addition to his barn.

A number of the Granum boys fought for the championship set of Willow creek bridge last Sunday. The principal participants were Hilby Reynolds and Dick Swain. After considerable elocution and also much physical exertion, Hilby was declared champion.

The new machine shop of M. R. Mathison is nearing completion. It is a brick building and will help to improve the town.

PROVINCE OF ALBERTA  
DEPARTMENT OF MUNICIPAL AFFAIRS

Notice is hereby given that unless all arrears of taxes imposed in respect of any parcel of land situated in Improvement Districts No. 100, 101, 130, 131, in the Province of Alberta, are paid on or before the first day of July next, such land will be dealt with under the provisions of the Tax Recovery Act, being Chapter 122, Revised Statutes of Alberta, 1922, with a view to obtaining Certificates of Title in the name of the Crown in the right of the Province of Alberta in respect of such parcel.

W. D. Spence,  
Acting Deputy Minister  
of Municipal Affairs.  
Edmonton, May 19, 1925.

Users of lawn and garden hose are reminded that the bylaw provides for the use of water for lawns and gardens from 6 to 9:30 o'clock p.m. only. All are warned against using water for these purposes at other hours.

## Tremendous Progress Made By Canadian Wheat Growing During Past Twenty-five Years

The natural resources intelligence service of the department of the interior at Ottawa says Canada has made tremendous progress in the past twenty-five years in the production of wheat, and the extension of her wheat areas is attracting considerable trade interest. At the opening of the present century, the prevalence of Canadian hard wheat became recognized, but occupied a comparatively insignificant position in the world markets of the world. Within the past twenty-five years—but in the life of a nation—that position has been entirely reversed, and Canada has advanced from ninth to second place as a grower of wheat and from fifth to first place as an exporter of this cereal.

The rapid increase in Canadian acreage devoted to wheat is shown by the following figures: In 1900 in Canada there was but 1,221,542 planted to wheat; in 1910 this area had increased to 8,861,121 acres; in 1920 to 15,252,574 acres; and in 1924 to 22,655,710 acres. The production of wheat in 1901 amounted to 56,272,725 bushels; in 1910 to 122,045,742 bushels; in 1920 to 22,655,710 bushels, and in 1924 to 47,159,000 bushels.

Canada's leadership in the world's wheat markets is illustrated by the enormous growth of exports. From the small amount of 1,529,000 bushels in 1901 they took up to such that at this time a big jump to 15,858,902 bushels in 1902, and 21,506,000 bushels in 1903. In 1910, 46,259,725 bushels of wheat was poured into the world market. In 1915 exports were 18,056,612 bushels, and in 1924, 47,159,000 bushels.

Canada has a wonderful opportunity, not only the productiveness of wheat fields and the extension of the wheat that her soil and climate produce, but in the fact that the wheat industry of Russia, which was a fierce competitor, has not recovered its pre-war status. Canadian wheat is much in demand both in Great Britain and on the continent, and is produced at a comparatively low cost, in competition with American grown wheat.

The farm cost of producing wheat in Western Canada in 1924, as estimated by the United States tariff commission, was 10.5 cents per bushel, including a land charge. Exported interest on slatted land values. These figures were opposed to a cost of \$1.47 per bushel, the estimated cost of producing similar wheat in Minnesota, Montana and the Dakota, made by the same authority.

Canadian wheat is acknowledged to be of an unusually high order and, through the Canadian system of grading and elevator service, the quality of the shipping is high among foreign buyers.

### Farmer Identified Prisoner

Proved in Peculiar Way His Owner

Ship of a cow was wrecked recently. When asked if he could identify some chickens which had lost and which two men were charged with stealing, J. McDonald, owner of a farm lying near Acton, told County Constable Chapman they were "quiet" head and always greeted his horse when he returned home from town by jumping on the shafts of the buggy.

McDonald took the constable in his buggy to where the chicken were, and immediately they saw the horse they performed their "stunt" by jumping all over the shafts of the buggy. The identification was complete.

### Following Alberta's Lead

Several States Seeking Information On Cream Grading System

Several states in adjoining the lead of Alberta in adopting the cream grading system. The latest to seek information is the state of Illinois, where it is hoped to be in operation next year. The state of West Virginia is also endeavoring to inaugurate a system modeled on the Alberta system. It is expected that Mr. Mackay, secretary of the American Association of Creamery Butter Manufacturers, who will visit Alberta this summer to study the system there.

### Formality of the White House

"There was just as much formality as at Buckingham Palace," declared Mrs. Chas. Thompson, speaking of the reception of women delegates to the international conference on women's congress in Washington, by President and Mrs. Coolidge, at the White House. Mrs. Thompson was elected to the office of the council of the congress.

It is likely that the conference will easily into experience than to swap it back.

By N. N. B. 1925

### Where Immigration Flows

Bulk of Immigration Must Make Its Way to the Prairies

No section of Canada is really popular to the point which makes an invasion of immigrants on a large scale possible without considerable expense and difficulties. It is only in the more sparsely populated west that there is opportunity for large numbers of immigrants in the future. Land here is comparatively cheap and the object of the immigration policy is, and must be, to get to the west which they can pay for. The only way to direct the stream from the western provinces to the other side is to cut down the value of farm land in the eastern provinces to a figure within reach of the newcomers or to open enough new territories to absorb them into the industrial system. Neither is practicable. With or without government direction, the tide will flow where the resistance to be encountered is least. As the west fills up the east will fill up, too, but for many years the bulk of immigration must make its way to the prairies. And after last winter's unemployment experience it should not be difficult for the provinces to understand that that is the only safe and sane policy to pursue.—Edmonton Bulletin.

### Canadian Seed Goes To U.S.

Alberta Alfalfa and Timothy Seed Finds Ready Market

A considerable quantity of alfalfa seed produced in Alberta last year was sold to the United States for seed. In the demand for northern-grown seed, it is estimated that a quarter of a million pounds were sold altogether. Alberta seed growers also sold one hundred thousand pounds of Timothy seed.

### Not To Be Denied

The Popular Press Monthly has discovered that if a baby cries one minute for 24 hours, it does work equivalent to lifting its own weight to the top of the Washington monument. To which the Toronto Free Press says: "We've heard 'em—and in less time than that—that's the roof."

### Former Governor-General Here

His Lordship the Earl of Aberdeen and Tennyson, and his wife, Countess of Aberdeen and Tennyson, arrived in Edmonton on Tuesday, having spent the last few days of their journey in the Dominion, of which His Lordship was Governor-General thirty years ago. They went with the British delegation to the seventh Quinquennial Conference of the International Council of Women, which met at Washington, D.C., May 4-14. The latter represented 25,000 women belonging to 32 National Councils, said the Countess of Aberdeen, who interviewed recently, and their aim is "Peace through civilization."

His Lordship organized the Victorian Order of Dames during her regime as Vice-Regent at Ottawa and has since seen it grow into a nationwide movement. "I gave me great pleasure," said His Lordship, "when our ship put in at Halifax in '98, to find a pleasure to meet old friends," said Lord Aberdeen, "and none do I count dearer than the friends I made in Canada. Lady Aberdeen and I crossed your glorious country on our last trip and we are among our happiest times. I love your broad, open prairies, your great lakes and towering mountains. Mention of our first trip reminds me of the old man who, endeavoring to convey to a Scotchman the immensity of Canada, said, 'Why, we have taken into which you could drop the entire British Isles and woods were Scotland would be lost except the small of whisky.'"

### B.C. Canned Fish

Product is Shipped to Many Ports Throughout the World

Exports of canned fish from Vancouver during the first three months of the current year show a considerable increase over the quantity shipped in a similar period during the past three years. In the first quarter of 1925 exports totaled 415,256 cases compared with 222,352 cases in 1924. Shipments were made to Australia, New Zealand, the Orient, Central and South America, West Indies, United Kingdom and continent, Fiji and South Africa.

### America's Favorite Meat

In the course of a year every resident of America eats on the average more than sixty pounds of pork which is the favorite meat. The per capita beef consumption is more than sixty pounds. Less well is being used—only eight pounds per capita. But Americans are not getting back to the old ways, for they consume now only five pounds of mutton and lamb annually—New York Times.

### New Idea in Ranching

Silk worm ranching is being carried on successfully in the Sacramento Valley of California. A company has commenced the incubating of two million eggs of silkworms for the coming season. The eggs were imported from France and Italy. The firm has more than twenty-five thousand mulberry trees planted for feeding the worms and producing the material from which silk is made.

### A Family Food in Tibet is Dried Yak Milk

and is used by the Tibetans for food.

### Protecting Dairy Products

Government Bill Provides For Heavier Penalties For Adulteration

Heavier penalties for the sale of adulterated dairy products are provided in a bill recently introduced in the House of Commons by the minister of agriculture, Hon. W. R. Matherwell. The bill was given second reading and referred to the agricultural committee.

The minister explained that the Dairy Industry Act did not clearly define what constituted adulteration of dairy products, and the amending bill would more sharply define what constituted an adulterator. Mr. Matherwell said that a number of adulterators had found it actually profitable to pay fines and go on breaking the act. It now would be better hearing penalties to discourage this.

### Hungarian Settlers

Between Fifty and Sixty Thousand Now Located in Canada

There are between fifty and sixty thousand Hungarian immigrants and their children in Canada, according to Dr. Frank Hoffman, of St. Andrew's College, Saskatoon. There being settlements at Oshawa, Pelly and Regina, composed of very independent, contented people with large families. In 1921 Dr. Hoffman established a library society in Regina, from which important social and national work amongst the Hungarians is carried on and the ideals of Canada citizenship brought constantly before them. The society is very successful on the land, amongst whom is J. Troth, Sr., who, beginning with a capital of \$250, now with his five sons own 20,000 acres of land.

### Livestock Exports From Alberta

The cattle and horses exported from livestock from Alberta during the past year show that 12,783 horses and 195,807 cattle were exported. Shipments between local points within the province totaled 5,615 horses and 106,446 cattle.

## Western Canada's Titled Farmers Are Playing An Important Part In Development Of Agriculture

### Natural Resources Bulletin

Natural Resources Means More Than Taking Out Raw Material

The natural resources intelligence service of the department of the interior at Ottawa says:

Development of natural resources means very considerably more than Canada that the taking out of raw material. Associated and necessary industries are found in the large and modern equipped industries that make up our urban centres.

Take our agricultural products for instance. In order that the best results may be secured modern machinery is necessary, while to market the crop requires many and varied accessories. Our four mills, to make the output available for the consumer, are large users of cotton and paper bags, which run into many millions annually.

Fruit growers require millions of containers, such as boxes, baskets, crates and barrels, to place their product on the market.

Forest development has built up a large manufacturing plant to provide the necessary machinery, while the output of our forests provides the raw material for many of our large industries.

Waterpower development, providing the hydro-electric energy which operates large pulp and paper mills and other plants, affords employment to armies of mechanics in the manufacture of machinery and electrical equipment. A recent order for the production of a new paper mill amounting to between \$500,000 and \$600,000.

The other great motive forces are shipped in oak logs, spruce and planer are made in paper bags, salt is packed here in cotton bags, while liquid minerals, such as oil, gasoline, etc., are shipped in barrels and tins.

Marketing of fish also calls for a variety of containers, from the small barrel to the oak barrel for pickled fish, while a great portion of the salt output of Canada is absorbed by her fisheries.

Natural resources and their development may appear to be of little interest to our people generally, but there is not one Canadian but who is directly or indirectly interested—either in his livelihood depends upon it, or in his earnings therefrom or his investments are absorbed and his dividend sources are governed by such development.

### Community Pasture Paying

Saskatchewan Government is Able To Reduce Grazing Rates

The Community Pasture operated on the old Matador Ranch by the Saskatchewan Government is starting on its third season, and as a result of increased patronage and careful management the government states they have been able to announce a reduction in grazing rates for cattle from 50 cents per head per month to 40 cents.

2311 head of cattle were taken care of during the summer of 1924, which, however, is less than half of what the pasture will accommodate and it has only been lightly grazed since the Matador herd was removed three years ago. Horses also are grazed at the rate of \$1.00 per head per month during the summer, while a special rate of \$2.00 is given for the winter season.

### Coming Back Financially

British Pound and Canadian Dollar Again Reach Par

Our British and Canadian brethren are exceedingly coming back, financially with a vengeance.

The Canadian dollar is not only equal in value to the American dollar, but occasionally goes above it in value. And now the pound sterling is about to reach par with the dollar. The British financial situation is not so good as it was, but it is true, but lending many billions in addition to what we supplied, they do credit for their quick return to complete financial responsibility.

They owe their recovery to the fact that they have the courage to tax themselves, and also the machinery to enforce taxation.—Buffalo Daily Star.

### Activity In Building

Building permits issued in Winnipeg since the beginning of the year to date amount in value to \$1,614,000, as against \$587,700 for the corresponding period of 1924, an increase of nearly 160 per cent. A number of building projects are in view at present, and it is anticipated that construction activity for 1925 will be considerably in excess of last year.

### Prince Charles Philippe d'Orléans

descendant of the Kings of France, and nephew of the King of Belgium, has recently arrived in Canada in the company of the Hon. John Starnes, who is his close friend, and Oxford, to become the latest addition to the growing list of titled agriculturists in Western Canada. He is at present on the ranch of Lord Rodney at Fort Saskatchewan, Alberta, where he will remain for a year as a pupil before acquiring a ranch of his own, probably in the vicinity of that of the Prince of Wales in Southern Alberta.

Western Canada, and in particular Southern Alberta, is being particularly favored by the aristocracy of Europe seeking fresh outlets for their endeavors along the lines of agriculture, and each year sees some addition to the territory's group of titled ranchers.

The Prince of Wales is a generalist, whereas the Prince has several predecessors among the titled families of Europe, as he has many more interests than the generally known fact that the Prince was in all probability guided to some extent in the selection of his ranch by reason of the close proximity to the Earl of Minto, which has been established some years before.

Lord Aberdeen and the Duke of Sutherland developed ranches in Western Canada, the former at the head of the lake in the Okanagan Valley in British Columbia, and the latter in the Brooks district of Southern Alberta. Before relinquishing his property at the first Lord Aberdeen had performed certain valuable connections with other country families, and also the development of the British Columbia fruit industry.

The area about the Duke of Sutherland's property has become famous as the birthplace of the Duke and his land had the honor in 1921 of bringing the championship for alfalfa seed to Canada for the first time.

In the case of High River district of Southern Alberta, where the ranch of the Prince of Wales is located, it is the mixed farming which is the basis of the Count de Farcy, a French nobleman who located there some years ago, and who is now one of the most successful agriculturists. North of this, near Calgary, is the grain farm of Admiral G. Mont, D.S.O., a relative of the King of Italy, which still carries on the Danish dairy policy of Markerville, where Prince Eric, son of the King of Denmark, lived for years and studied farming. Continuing still farther north, one comes to the district of Fort Saskatchewan, north of Edmonton, where the ranch of Lord Rodney, where the Prince Francis is learning the rudiments of war (military) and which the English nobleman has been developing for years along practical lines.

Since the war, following the upheaval in Europe, Western Canada has received many refugees of the old nobility, particularly from France, who in the new land are finding new lives. In addition, many individuals of high rank in the allied nations, and the desire for more tranquil existence, taken up the threads of civil life as farmers upon the plains of Western Canada.

This tendency, so pronouncedly evident in the years since the termination of the war, is merely a further indication of the absolute democracy of Western Canada, and the high standing of agriculture in that territory is not equal to the demand, and ever clear calling, up to the level of the pursuit of the world's most important industry.

### Otrich Princess For Prince

When the Prince of Wales arrived in Europe, South Africa, in the midst of the riotous country, the entire place was a riot of official feathers, even the royal train being decorated with white.

The Prince was welcomed by a command of 150 local farmers, all of the royal train being decorated with white. After the reception the feathers worn by the Burgers all were handed to the Prince, who presented them to the Prince as a gift.

### Shortage of Farm Hands

In some sections of the considerable number of farm hands from the Old Land and European countries are being distributed on western farms, the supply is not equal to the demand, and shortage is becoming more pronounced as spring work develops more extensively. When the shortage is as great as \$200 to \$400 per month and board.

### Wealth adds to the wisdom of the wise and to the folly of the fool.

Do not wait for the canvassers. Volunteer your contract. Sign one up and send it in. This will encourage others to do so.

**To the Farmers and Farm Women:**

These Pools are YOUR POOLS. They are being organized because you want them and need them. Their success or failure depends upon your loyalty and support. The best evidence of your belief in co-operative marketing is a signature to a contract.

**HAVE A SAY IN MARKETING YOUR OWN PRODUCTS**
